

WEAR IT RIGHT. LIVE IT RIGHT.

THE CORRECT FIT OF A PFD CAN **SAVE YOUR LIFE.**

1 SHOULDERS

Shoulder straps should fit snugly and not slip down your arms.

2 CHEST

The PFD should fit snugly across your chest. You should not be able to lift it up past your chin.

3 WAIST BELT

Fasten all buckles and adjust so the PFD is snug and secure around your waist.

4 CROTCH STRAP

Secure the crotch strap and adjust so it is snug. This keeps the PFD from riding up.

DO THE BOB TEST

In the water, the PFD should keep your chin and mouth above the surface.

**IF IT DOESN'T,
IT DOESN'T FIT.**

1 CALM

PFD supports you with your mouth well above the water.

2 LEAN BACK

PFD keeps your mouth and nose above the water.

3 FLOAT

PFD keeps your face above water so you can breathe.

**WEAR IT.
CHECK IT.
LIVE IT.**

A properly fitted PFD won't save your life if you don't wear it.

WEAR YOUR PFD EVERY TIME YOU'RE ON THE WATER.
